Data Appendix

Countries in dataset:

Algeria	Ethiopia	Namibia
Angola	Gabon	Niger
Benin	Gambia	Nigeria
Botswana	Ghana	Rwanda
Burkina Faso	Guinea	Senegal
Burundi	Guinea-Bissau	Sierra Leone
Central African Republic	Kenya	Swaziland
Chad	Madagascar	Tanzania
Cote D'Ivoire	Malawi	Togo
Democratic Republic of the Congo	Mali	Uganda
Eritrea	Mauritania	Zambia

Variable overview:

Variable name	Variable description	Original downloaded unit of measure	Changes to data	Final unit of measure	Data Source
<i>lmal</i>	Total Malaria cases	Total suspected cases	Divide by 1000	Cases per 1000 people	WHO
<i>agr</i>	Agricultural area	Area per 1000 ha	logged all data points for normality	Logged area per 1000 ha	FAO
<i>lfor</i>	Forest area	Area per 1000 ha	logged all data points for normality	Logged area per 1000 ha	FAO

<i>lirr</i>	Total area equipped for irrigation	Area per 1000 ha	logged all data points for normality	Logged area per 1000 ha	FAO
<i>cer</i>	Total cereal yield	Hectograms/hectare	Divide all data points by 10,000 to convert from hectograms to tons	Tons/hectare	FAO
<i>lngdp</i>	GDP per capita, PPP	(Constant 2005 international \$)	logged all data points		World Bank
<i>sqcemen t</i>	CO2 emissions from cement production	(thousand metric tons)	Square rooted all data points for normality	Square root(thousand metric tons)	World Bank
<i>rural</i>	Rural population	% of total population	n/a	% of total population	World Bank
<i>lnpop</i>	Population	Total people	Logged all data points	Logged total population	World Bank
<i>young</i>	Population ages 0-14	% of total population	n/a	% of total population	World Bank
<i>Interrha</i>	Terrestrial protected areas	sq km	Divide all data points by 10 to convert to area per 1000 hectare and logged	Logged area per 1000 ha	World Bank
<i>life</i>	Life expectancy at birth	total years	n/a	total years	World Bank
<i>health</i>	Health expenditure, public	% of GDP	Took square root for normality	Square rooted % of GDP	World Bank
<i>inv</i>	Gross public investment	% of GDP	lagged by one year	% of GDP lagged one year	World Bank
<i>labor</i>	Labor force participation rate, total	% of total population ages 15-64	n/a	% of total population ages 15-64	World Bank
<i>govt</i>	Government Effectiveness	Estimate of governance	n/a	Estimate of governance	Worldwide Governance Indicators from World Bank

<i>reg</i>	Regulatory quality	Estimate of governance	n/a	Estimate of governance	Worldwide Governance Indicators from World Bank
<i>percoast</i>	Population living 100 km from coast	total population	Divided all data points by total population	% of population living 100 km from coast	UN Environmental Program
<i>mallab</i>	$lmal * labor$	Interaction term			
<i>malinv</i>	$lmal * inv$	Interaction term			

Histograms:

D) Malaria

World Health Organization. World malaria report 2013, Appendix 6D . World Health Organization, 2013. Retrieved from http://www.who.int/malaria/publications/world_malaria_report_2013/en/

Description: Logged total suspected malaria cases per 1,000 people

Missing observations: 2

Variable	Obs	Mean	Std. Dev.	Min	Max
<i>lmal</i>	295	6.486733	1.843131	1.771727	9.467617

Histogram of malaria cases per 1,000 people

Histogram of logged malaria cases per 1,000 people

II) GDP data

The world bank, World Development Indicators (2014). *GDP per capita, PPP (Constant 2005 international \$)*. Retrieved from <http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Logged GDP per capita, PPP (Constant 2005 international \$).

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
lngdp	297	7.216821	.8722221	5.569924	9.496856

Histogram of per capita GDP

Histogram of logged per capita GDP

III) Forest area

FAOSTAT, Food and Agriculture Organization of the United Nations (2014). *Forest area*.

Retrieved from <http://faostat3.fao.org/faostat-gateway/go/to/download/R/RL/E>

Description: Logged forest area per 1000 hectare

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
lfor	297	8.473378	1.624956	5.157905	11.9636

Histogram of logged forest area

IV) Agricultural area

FAOSTAT, Food and Agriculture Organization of the United Nations (2014). *Forest area*.

Retrieved from <http://faostat3.fao.org/faostat-gateway/go/to/download/R/RL/E>

Description: logged agricultural area per 1,000 hectares

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
agr	297	9.393908	1.279902	6.204558	11.26446

Histogram of logged agricultural area

V) Irrigation

FAOSTAT, Food and Agriculture Organization of the United Nations (2014). *Total area equipped for irrigation*. Retrieved from <http://faostat3.fao.org/faostat-gateway/go/to/download/R/RL/E>

Description: Logged total area equipped for irrigation per 1,000 hectares

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
lnirr	297	3.589905	1.643967	0	6.990256

Histogram of logged area equipped for irrigation

VI) Cereal data

FAOSTAT, Food and Agriculture Organization of the United Nations (2014). *Cereals, Total + (Total)* . Retrieved from <http://faostat3.fao.org/faostat-gateway/go/to/download/R/RL/E>

Description: Total yield of cereals in tons per hectare

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
cer	297	1.177754	.4818472	.158229	2.766479

Histogram of cereal production

VII) Protected terrestrial area

The world bank, World Development Indicators (2014). *Terrestrial protected areas (sq km)*.

Retrieved from

<http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Logged protected terrestrial areas per 1000 hectares

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
Interrha	297	7.925282	1.834999	2.851458	10.2083

Histogram of logged terrestrial protected area

VIII) Young: Population under 14 years old

The world bank, World Development Indicators (2014). *Population ages 0-14 (% of total)*

Retrieved from

<http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Percentage of population between 0-14 years old

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
young	297	43.0794	3.874518	27.39492	48.99195

Histogram of percentage of population under 14 years old

IX) Labor force

The world bank, World Development Indicators (2014). *Labor force participation rate, total (% of total population ages 15-64)*. Retrieved from <http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Labor force participation rate, total (% of total population ages 15-64)

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
labor	297	73.63098	11.22167	45.3	90.8

Histogram of labor participation rate

X) Population

The world bank, World Development Indicators (2014). *Population, total*. Retrieved from <http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Logged total population

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
lnpop	297	16.07744	1.20649	13.82755	18.85563

Histogram of logged population

XI) Health expenditure

The world bank, World Development Indicators (2014). *Health expenditure, public (% of GDP)*. Retrieved from <http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Square rooted public health expenditure (% of GDP)

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
sqhealth	297	1.567647	.3668554	.4780961	2.565595

Histogram of square rooted public health expenditure

XII) Rural population

The world bank, World Development Indicators (2014). *Rural population (% of total)*. Retrieved from <http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Percent of population that lives in rural areas

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
rural	297	65.42327	16.35679	14.6308	91.5282

Histogram of rural population

XIII) Life expectancy

The world bank, World Development Indicators (2014). *Life expectancy at birth*. Retrieved from

<http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Life expectancy at birth in years

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
life	297	52.76819	6.174681	40.57768	72.62276

Histogram of life expectancy at birth

XIV) Cement production

The world bank, World Development Indicators (2014). *Life expectancy at birth*. Retrieved from

<http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Square rooted CO2 emissions from cement production in thousand metric tons

Missing observations: 0

Variable	Obs	Mean	Std. Dev.	Min	Max
sqcement	297	13.91092	16.77433	0	94.74606

Histogram of CO2 emissions from cement production

XV) Investment

The world bank, World Development Indicators (2014). *Gross public investment (% of GDP)*. Retrieved from <http://databank.worldbank.org/data/views/variableselection/selectvariables.aspx?source=africa-development-indicators>

Description: Lagged gross public investment as % of GDP

Missing observations: 54

Variable	Obs	Mean	Std. Dev.	Min	Max
laginv	243	7.17092	3.79793	.1203258	26.25196

Histogram of lagged public investment

XVI) Government effectiveness

Daniel Kaufmann, Aart Kraay and Massimo Mastruzzi (2010). *Worldwide Governance Indicators*. The World Bank. Retrieved from <http://info.worldbank.org/governance/wgi/index.aspx#home>

Description: Estimate of governance, Reflects perceptions of the quality of public services, the quality of the civil service and the degree of its independence from political pressures, the quality of policy formulation and implementation, and the credibility of the government's commitment to such policies.

Missing observations: 33 (Missing 2001 data)

Variable	Obs	Mean	Std. Dev.	Min	Max
govt	264	-.7633795	.4985083	-1.768885	.7272412

Histogram of government effectiveness

XVII) Regulatory quality

Daniel Kaufmann, Aart Kraay and Massimo Mastruzzi (2010). Worldwide Governance Indicators. The World Bank. Retrieved from <http://info.worldbank.org/governance/wgi/index.aspx#home>

Description: Estimate of governance, Reflects perceptions of the ability of the government to formulate and implement sound policies and regulations that permit and promote private sector development.

Missing observations: 33 (missing 2001 data)

Variable	Obs	Mean	Std. Dev.	Min	Max
reg	264	-.6376965	.5042844	-2.260322	.7914705

Histogram of regulatory quality

XVIII) Population within 100 km of coast

UNEP (2014): The UNEP Environmental Data Explorer, as compiled from UNEP/DEWA/GRID-Geneva . United Nations Environment Programme. Retrieved from http://geodata.grid.unep.ch/mod_download/download.php

Description: Percentage of population living within 100 km of coast

Missing observations: 66 (Missing 2008 and 2009 data; however, this variable is not expected to change very much year to year, as landlocked countries generally have 0% of population within 100 miles of coast)

Variable	Obs	Mean	Std. Dev.	Min	Max
percoast	231	.3013986	.3255677	0	1.113264

Histogram of percent of population living within 100 km of coast

n.b. *percoast* is not normal because landlocked countries have 0% of population within 100 km of coast. This makes *percoast* similar to a dummy variable.

Interaction terms

XIX) Malaria Labor interaction term

Description: interaction of *lmal* and *labor* variables

Missing observations: 2

Variable	Obs	Mean	Std. Dev.	Min	Max
mallab	295	484.5047	168.0152	102.2286	858.7128

Histogram of *mallab*

XX) Malaria investment interaction term

Description: interaction of *lmal* and *laginv* variables

Missing observations: 56

Variable	Obs	Mean	Std. Dev.	Min	Max
malinv	241	45.20664	26.62587	.9479987	134.7341

Histogram of *malinv*

Model Specification:

MODEL I:

Two way scatterplot of residuals vs lmal

Histogram of residuals for model 1

Two way scatterplot of lmal vs lngdp

Two way scatterplot of lmal vs lfor

Scatterplot of malaria vs irrigation

Ran a Breusch-pagan test for heteroskedasticity of fitted values of lmal

```
. estat hetttest
```

Breusch-Pagan / Cook-Weisberg test for heteroskedasticity

Ho: Constant variance

Variables: fitted values of lmal

chi2(1) = 1.34

Prob > chi2 = 0.2479

MODEL II:

Two way scatter of uhat vs lngdp

Histogram of residuals for model 2
